

Alexandre Costa Web developer

During my professional experience as a web developer, I was able to apply what I've learned on my degree while working with a team of professional developers and learn more with them.

I'm more experienced in front-end, developing with JavaScript based technologies, but I can easily adapt to new technologies.

In my free time I enjoy playing the violin, going for walks and taking/editing photos.

Born in

Silves, Faro, Portugal
May 19th 1998

Languages

Portuguese (fluent)	Spanish (advanced)
English (fluent)	Korean (beginner)
